

TIGER[®] ULTRA DIGITAL TIGER[®] HIGH DIGITAL DIGITAL TO GO!

THE LIGHTEST
TIG-DEVICE IN
HIS CLASS

from **7.5 kg**

TIGER[®]
The benchmark for modern welding

TRADES

The mobile solution for all welding tasks that trades encounter every working day. Regardless of whether the task involves the processing of stainless steel, aluminium, steel, copper or titanium in different material thicknesses.

The **TIGER® digital** can do it all!

■ **TIGER® digital: Spot-welding and welding perfection. Success with REHM HYPER.SPOT and REHM HYPER.PULS.**

The **TIGER® digital** provides excellent quality, perfect weld seam appearance and significantly reduces rework. All of these advantages together with unparalleled mobility. The gas cooled version has a maximum weight of 7.9 kg making the **TIGER® digital** the lightest TIG device in his class.

INDUSTRY

Welding in the assembly and maintenance area is highly demanding. Mobility and the simple handling of the unit are particularly important requirements in practice.

Due to a new, intuitive operating concept the **TIGER® digital** provides maximum reliability when selecting welding parameters, which in turn enhances user friendliness. The digital display makes it easier to achieve the right setting reliably and quickly, even for an inexperienced welder.

■ **TIGER® digital: The result counts.**
Which is why the perfect arc is a must.

The **TIGER® digital** has **8 process variants** and masters any application with the correct arc.

THE LIGHTEST
TIG-DEVICE IN
HIS CLASS

from **7.5 kg**

TIGER

The benchmark for modern welding

Practical handle

The handle on the **TIGER® digital** offers the most optimum convenience. An interference-free storage solution for stowing the hose pack and associated equipment, which ensures welders always have their second hand free.

Everything to hand

The **TIGER® digital** draw ensures that all of the unit's wear parts are to hand. Everything in one place, no more running around looking for parts. That saves time and money.

Dropping allowed...

and that from a height of up to 90 cm. The **TIGER® digital** housing is designed so that the impacts that occur from being dropped from this height will not interfere with the performance electronics.

Each job has one button

Storing and recalling the most important device settings cannot be any quicker.

Everything in digital view

Everything at a glance in an excellent graphic presentation. Protected by a shock-resistant plastic screen, the display is simply more robust than conventional displays.

A button for everything

The R-Pilot rotary encoder, especially developed for tough applications, intercepts mechanical effects. The housing absorbs forces before they can damage the electronics.

Dirt and filth don't matter

The electronics space is encapsulated and is always kept clean and protected. Contaminated air and grinding dust from the working environment are channelled through a special air channel.

The benchmark in operating welding machines

SIRIUS is an innovative digital operating system.
 SIRIUS simplifies the operation of complex digitally controlled processes.
 SIRIUS offers graphically dynamic and transparent visualization.
 SIRIUS includes assist functions.
 SIRIUS enjoys the highest level of user acceptance.
 SIRIUS makes complex things simple.

The classic screen

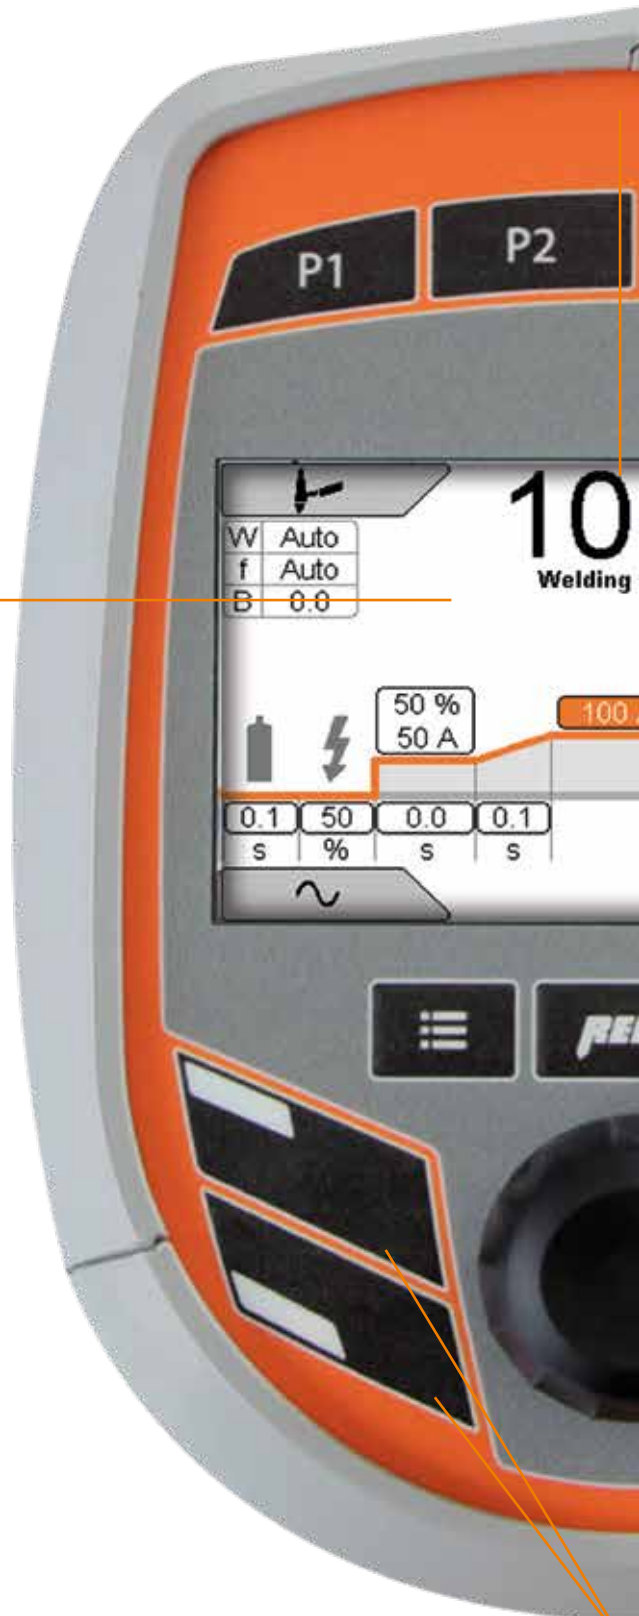

The self-explanatory graph shows all settings at a glance. Interdependencies become transparent and understandable.

Dynamic graphic display

Changes to welding parameters are graphically displayed. Erroneous settings are immediately recognised. Only that which is currently active is actually displayed.

■ **Circumferential weld**
Function: **HYPER.PULS**
without filler material

■ POWER FACTOR CONTROLLER (PFC)

THE BENCHMARK FOR EFFICIENT WELDING

- Compliance with the new regulation EU 2019/1784
- Highest energy efficiency
- Worldwide operation
- Clean consumption out of the supply network
- Use also in residential areas (useable anywhere)

You can find everything you need to know about PFC here:

■ The TIGER® *digital* in the versions ULTRA and HIGH

ULTRA version:

- Everything you could wish for
- Full range of functions
- High-end for mobile TIG welding

HIGH version:

- Alternative, optimised for pipeline construction and assembly areas
